

WAKEBOARD SELECTION

EXPLOSIVE

Abrupt release off the wake for more vertical air.

CONSISTENT

Predictable release with landings further into the flats.

FLUID

Relaxed transitioned turns, perfect for a progressive edge.

INSTANT

Reacts quickly when a heel or toeside edge is initiated.

DEFINE YOUR STYLE

SELECTION CHART

Because every shape in our line was designed with a different style of ride in mind, we have created an easy, at-a-glance guide to help point you in the right direction. As always though, we encourage riders to swing by an authorized Hyperlite retailer and demo any one of our shapes.

ROCKERS & FLIGHT PATH

The Hyperlite line features four distinct rocker lines all designed for varying styles of riders. From a fluid Continuous rocker to an explosive Blended 3-Stage, you're sure to find the perfect fit for your style.

CONTINUOUS

The rocker line that started it all. Speed and fluid, predictable pop truly define this rocker. Designed to carry great speed into the wake with minimal drag, a Continuous rocker generates a longer trajectory with similar pop every time.

ABRUPT CONTINUOUS

This rocker line adds a little more kick to the speed that so many riders look for. The Abrupt Continuous rocker line transitions to a slightly exaggerated tip and tail rocker creating added pop without sacrificing speed into the wake.

SUBTLE 3-STAGE

This is the stepping-stone to the 3-stage rocker style of ride. Utilizing a smaller flat spot between your feet, a Subtle 3-Stage rocker creates just enough vertical pop to know it's there.

BLENDED 3-STAGE

Our Blended 3-Stage rocker creates explosive vertical pop. Designed to boot a rider off the wake, the Blended 3-Stage rocker line also generates good speed into the wake without the traditional 3-Stage drag.
